

This ruling imperils K-Love, a listener supported Christian Radio station that delivers a national signal through the use of translators. K-Love has long served the community through providing an alternative, uplifting, and positive influence. Along with their music they offer many other services to aid their audience. Were the station displaced by a LPFM station, many communities would lose their only source of Christian radio programming along with their connection to many helpful services. Please do not allow the new LPFM stations to have priority over existing stations that have a proven track record of serving the community. Thank you.
